

25
JUBILÆUM
NAVER COLLECTION CELEBRATING 25 YEARS

Excellent design and craftsmanship, proudly produced in Denmark for more than 25 years

naver
collection[®]

we take pride in every detail

Totally natural

We love wood. There, we said it. Like Naver cabinetmakers, we live and breathe wood. It is natural for us to create contemporary and future furniture in wood. We do it with great care and dedication, down to the smallest detail, both in the design and with the least possible impact on the environment. Wood naturally binds CO₂ until it decays. A smart characteristic that helps people and the climate.

Work smarter

We rethink processes to minimize the waste of wood. Either with our hands in cabinetmaking craftsmanship or with the machines that are part of modern furniture production. For example, we recycle the residual wood from our production. We reuse it in new Naver Collection furniture or in new circular life cycles with our partners.

True Naver cabinetmaker

As furniture producers Gramrode Møbelfabrik A/S and Aksel Kjersgaard A/S, we have been firmly established in Danish furniture culture since 1924 and 1952 respectively. This is where the design tradition originates and continues to grow from. Since 1995, Naver Collection has been collaborating with Danish designers such as Ebbe Gehl & Søren Nissen, Henrik Lehm, Hans Sandgren Jakobsen and Susanne Grønlund, who have all

made their mark both nationally and internationally. They have all put their distinctive mark on the Naver Collection partnership. And they continue to do it – with energy and innovation. Their passion and professionalism are clearly expressed in the design.

Falder os naturlig

Kort og godt; Vi elsker træ. Så er det sagt. Som Navere lever og ånder vi for træ. Det falder os helt naturligt at skabe nutidens og fremtidens møbler i træ. Vi gør det med stor omtanke og dedikation helt ned i detaljen både i designet og med mindst mulig belastning af miljøet. Træ som materiale binder helt naturligt co₂ indtil det forgår. En smart egenskab, der hjælper klima og mennesker.

Work smarter

Vi gentænker processer for at minimere spild af træ. Enten med vores hænder i snedker-håndværket eller med de maskiner, der indgår i en moderne møbelproduktion. Vi genanvender f.eks. resttræet fra vores produktion. Det indgår i nye Naver Collection møbler eller i nye cirkulære livscyklusser hos vores samarbejdspartnere.

I Navernes ånd

Vi - møbelproducenterne Gramrode Møbelfabrik A/S og Aksel Kjersgaard A/S - er solidt funderet i den danske møbelkultur siden hhv. 1924 og 1952. Det er her designtraditionen udspringer fra og gror videre. Siden 1995 har Naver Collection i fælleskab med danske designere som Ebbe Gehl

& Søren Nissen, Henrik Lehm, Hans Sandgren Jakobsen og Susanne Grønlund, gjort sig bemærket nationalt og internationalt. De har alle sat deres markante aftryk i Naver Collection samarbejdet. De gør det til stadighed - energisk og innovativt. Passionen og fagligheden kommer tydligt til udtryk i designet.

We take pride in every detail

For 25 years, we have focused with pride and dedication on the detail in our cabinetmaking work. Each piece of furniture in the Naver Collection design concept has its own unique characteristics. Made as a part of the whole, where form and function are combined in an outstanding and consistent design. This is the core of our philosophy and the foundation of our craftsmanship. We are happy and proud to be able to mark a significant milestone. We now look forward to continuing our work on promoting sustainability in production and design. Enjoy the details, the wood and craftsmanship on the following pages, featuring new and familiar designs in the Naver Collection.

We take pride in every detail

I 25 år har vi med stolthed og dedikation sat fokus på detaljen i snedkerarbejdet. Hvert møbel i designkonceptet Naver Collection har sine egne unikke egenskaber. Udført som en del af en helhed, hvor form og funktion kombineres i et fremragende og konsekvent design. Det er kernen i vores filosofi og grundlaget for vores håndværk. Vi er glade og stolte over nu at kunne runde en markant milepæl. Nu glæder vi os til fortsat at arbejde med bæredygtighed i produktion og design. Nyd detaljerne, træet og håndværket på følgende sider, der byder på nye og kendte designs i Naver Collection.

Ro Desk AK 1310 | Design: Hans Sandgren Jakobsen
Midas Arm Chair GM 576 | Design: Susanne Grønlund

Ro Desk was originally designed for Snedkernes Efterårsudstilling, the Autumn Cabinetmaker Exhibition 2018, on the theme of MONO – a single piece of furniture with an awareness of craftsmanship. Ro demonstrates the finely tuned harmony of round curves, a core leather top, mitre joints and a New Nordic Rococo, minimizing luxurious details into a tight artistic style.

Ro Desk er oprindeligt designet til Snedkernes Efterårsudstilling 2018 under temaet MONO - Et møbel med håndværksmæssig forståelse. Ro demonstrerer en afstemt harmoni af runde kurver, kernelæder top, geringssamlinger og en New Nordic Rococo, hvor overdådige detaljer er minimeret til et stramt formsprog.

Ebbe Gehl designer DD | Nissen & Gehl mdd.

Dansk design og fine håndværkstraditioner er det fundament Naver Collection er bygget på. Træets smukke overflade og unikke egenskaber er kernen i designprocessen. En proces, hvor visioner, materialer og funktion bliver samlet i et æstetisk og unikt design udtryk, hvor træets fine struktur fremhæves bl.a. ved at skabe en raffineret kontrast med materialer som bl.a. stål, glas eller Corian.

Ebbe Gehl har, i et mangeårigt samarbejde med Søren Nissen, designet hovedparten af Naver Collections produkter.

Naver Collection is built on a foundation of Danish design and fine traditions of craftsmanship. The beautiful surface and unique features of the wood are at the heart of the design process. A process where visions, materials and function are combined into an aesthetic and unique design expression, highlighting the fine structure of the wood by creating a refined contrast with materials such as steel, glass or Corian®.

Ebbe Gehl has designed most of the Naver Collection products, in a long-standing collaboration with Søren Nissen.

Tambour Door Cabinet AK 2740 | Design: Nissen & Gehl mdd.

The AK2740 cabinet and AK2742 bar cabinet from architect duo Nissen & Gehl mdd., are designed with a refined lightness using only the best materials. A combination of wood, brushed steel, white Corian® and tambour doors gives the cabinets a distinctive artistic style. The inside of the cabinets is fitted with 2 solid wooden drawers with visible finger joints, testifying to the solid craftsmanship, and removable glass shelves.

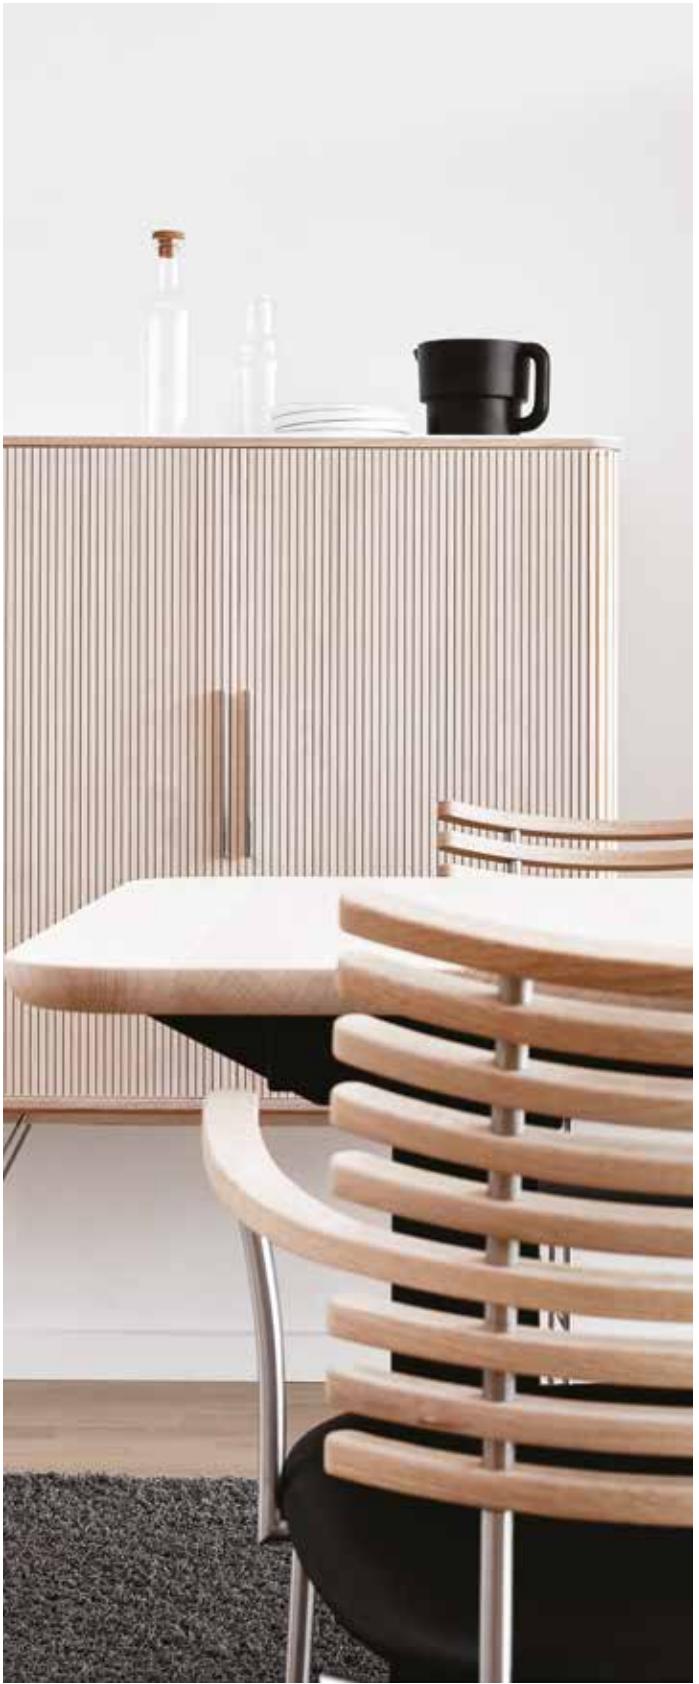

The bar cabinet comes with a Corian® insert to hold wine bottles. The decorative brushed steel legs add a touch of lightness and elegance to the furniture, making it easy to find a place in your home.

AK2740 skab og AK2742 barskab fra arkitektduoen Nissen & Gehl mdd., er designet med en raffineret lethed i de bedste materialer. En kombination af træ, børstet stål, hvid Corian® samt jalousilåger giver skabene et karakteristisk formsprog. Indvendigt er skabene indrettet med 2 massive træskuffer med synlig sinkning, der vidner om det solide håndværk samt flytbare glashylder.

Barskabet kommer med en indsats i Corian® til vinflasker. De dekorative ben af børstet stål tilfører en lethed og elegancetil møblet, der gør det nemt at placere i hjemmet.

Designer Henrik Lehm

"For mig handler det om at skabe et fuldendt møbel. Materialerne er nøje forenet, så brugeren ikke kan se, hvordan møblerne er samlet. Det elegante samspil mellem det rustfri stål og det massive træ opleves som en naturlig helhed. Det er detaljerne, der giver møblet sin stemme og som gør en forskel for brugeren. Derfor er det vigtigt for mig, at brugeren befinder sig godt i møblet."

"For me, it's about creating a complete piece of furniture. The materials are carefully combined, so the user can't see how the furniture is assembled. The elegant interplay between the stainless steel and solid wood results in a natural whole. It's the details that give the furniture a voice and make a difference for the user. Therefore it's important to me, that the user feels comfortable in the furniture."

Dining tables & chairs

Dining Table GM 6672 | Design: Nissen & Gehl mdd.
Midas Arm Chair GM 576 | Design: Susanne Grønlund

The new chair has been given the name Midas. The chair is designed to provide a "royal sitting experience". Midas was a rich and famous king of antiquity, who only wanted the best of the best.

The Midas chair is designed by Susanne Grønlund, who created the chair with strong roots in history, combining Danish and international design traditions with its elaborate wood, delicate design and high sitting comfort.

The moulded wooden elements of the chair have been produced and cut into soft curves that welcome you as you sit down. The distance between the individual parts varies – sometimes the curves follow each other, while in other places they approach each other elegantly before going their separate ways again.

The chair's graphic curves blend well with the frame, giving the chair a modest lightness that fits perfectly in the modern home. The angle between the seat and back carefully adjusts to the optimum seating position, so comfort is always a priority, whether you are sitting upright or sliding slightly forward in the seat and leaning back – even when you are sitting in the chair for a long time.

Den nye stol har fået navnet Midas. Stolen er designet til at yde en "kongelig siddeoplevelse". Midas var en rig og berømt konge i Antikken, der kun ville have det bedste af det bedste.

Midas-stolen er designet af Susanne Grønlund, som har udført stolen med stærke rodder i historien, der kombinerer den danske og den internationale designtradition med sit formspændte træ, sit slanke design og sin høje siddekomfort.

De formspændte træelementer i stolen er udført og skåret til i bløde kurver, så du bliver taget godt imod, når du sætter dig. Afstanden mellem de enkelte dele varierer – Nogle steder følges kurverne ad, mens de andre steder elegant nærmer sig hinanden for igen at gå hver til sit.

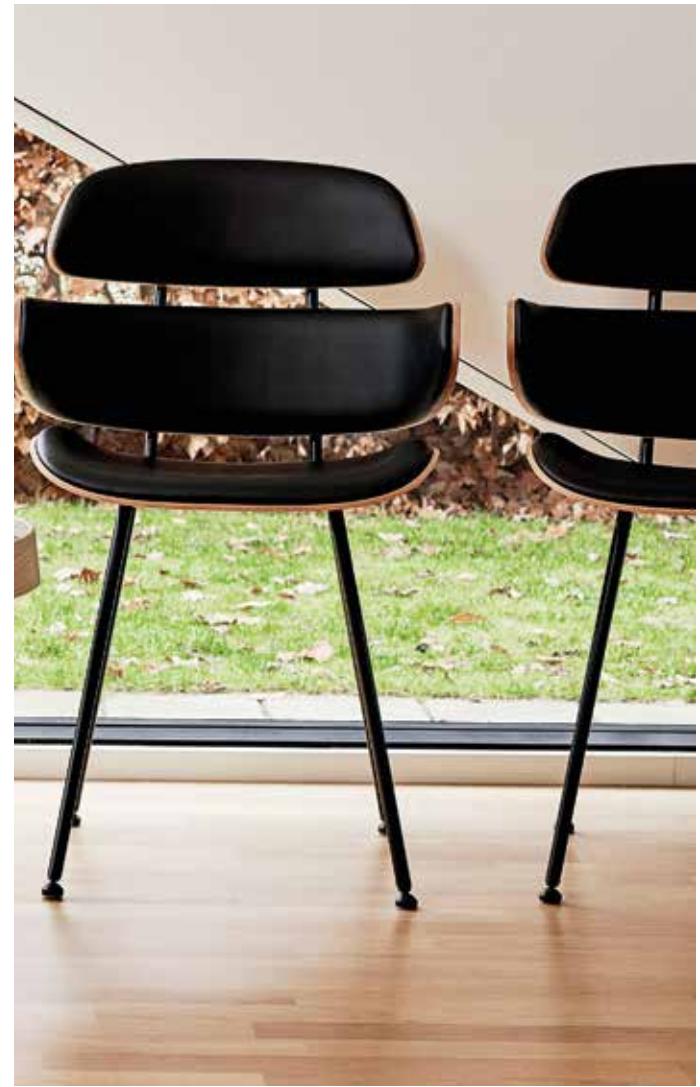

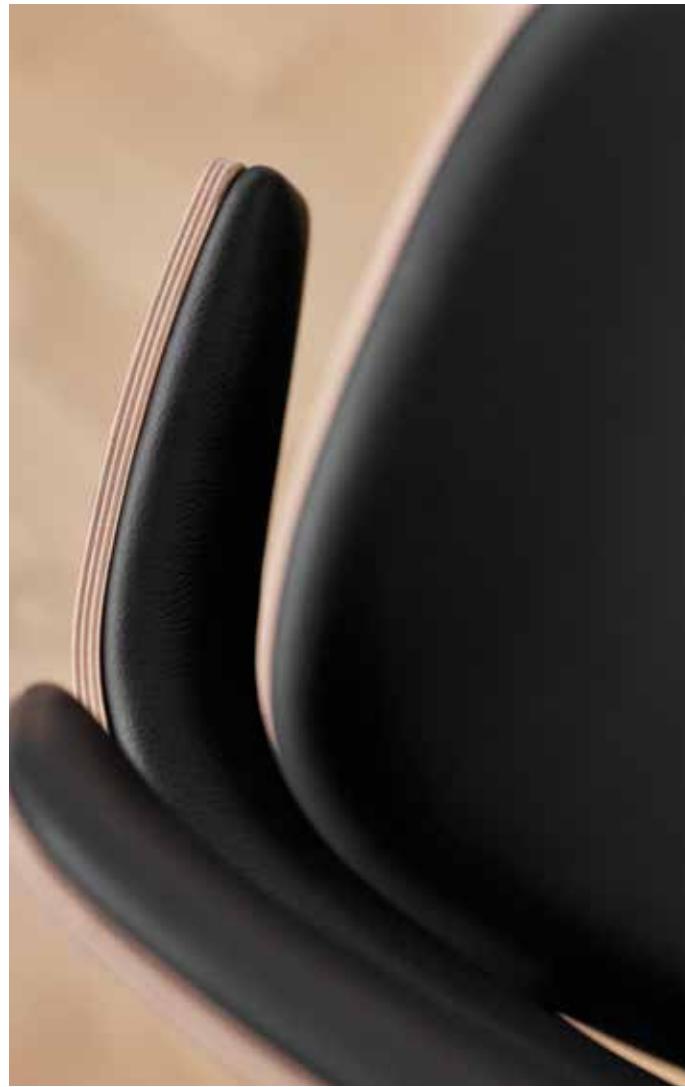

Stolens grafiske kurver falder godt i spænd med stellet, der giver stolen en beskeden lethed, så den passer perfekt ind i det moderne hjem. Vinklen mellem sæde og ryg er grundigt tilpasset den optimale siddestilling, så komforten er i højsædet, uanset om du sidder opret eller glider lidt frem i sædet og læner ryggen tilbage – også selvom du sidder i stolen over lang tid.

Designer Hans Sandgren Jakobsen

"Et godt design består af funktion, æstetik og innovation. Det skal kunne brydes, være smukt og innovation betyder at man bruger materialet på en ny måde" - Hans Sandgren Jakobsen, designeren bag Turning Boxes og skrivebordet Ro.

"A strong design consists of function, aesthetics and innovation. It must be refracted, beautiful and innovation means using the material in a new way," says Hans Sandgren Jakobsen, the designer behind Turning Boxes and Ro Desk.

Søren Nissen designer DD | Nissen & Gehl mdd.

Naver design skal være funktionelt og unikt i sit udtryk. I vores designproces bliver vision og materialer udformet til en funktionel og æstetisk form. I alle Naver produkter er hver enkelt detalje specielt udformet som en væsentlig del af helheden og udtrykket i det endelige Naver produkt.

Søren Nissen har, i et kreativt samarbejde med Ebbe Gehl, designet en stor del af Naver Collections produkter.

Naver design must be functional and unique in its expression. In our design process, vision and materials are designed to create a functional and aesthetic form. In all Naver products, every detail is specially designed as an essential part of the whole and an expression of the final Naver product.

Søren Nissen has designed a large part of the Naver Collection products, in a creative collaboration with Ebbe Gehl.

Dining Table GM 7720 | Design: Nissen & Gehl mdd.

God funktion er et nøgleord i Naver Collections designkoncept. Borde skal være praktiske og kunne udvides, skuffer og låger skal fungere perfekt, og man skal sidde virkelig godt i en stol. Et Naver-møbel er omhyggeligt udviklet og formgivet til sit specifikke formål.

Good function is a keyword in Naver Collection's design concept. Dining tables must be practical and extendable. Drawers and doors must work perfectly and chairs should be really comfortable to sit in. A piece of Naver furniture has gone through a thorough development and design process to fulfil a given purpose.

Under Danish skies

We give the wood back to the world in the form of beautiful processing. And we do it under Danish skies.

The Naver Collection has a solid foundation and is produced in Denmark. This means we can avoid unnecessary long distances and transport, which have an adverse impact on the environment. This is where the design tradition originates and continues to grow from. We're right here – around the corner.

We take pride in every detail

Some people might say that we are just really picky in our choice of materials. This may be the natural consequence of being a Naver cabinetmaker. The craftsmanship is shown in the details. We combine vision, materials and function in an aesthetic whole, where every detail of the furniture expresses the quality and uniqueness of Naver craftsmanship.

Under dansk himmelstrøg

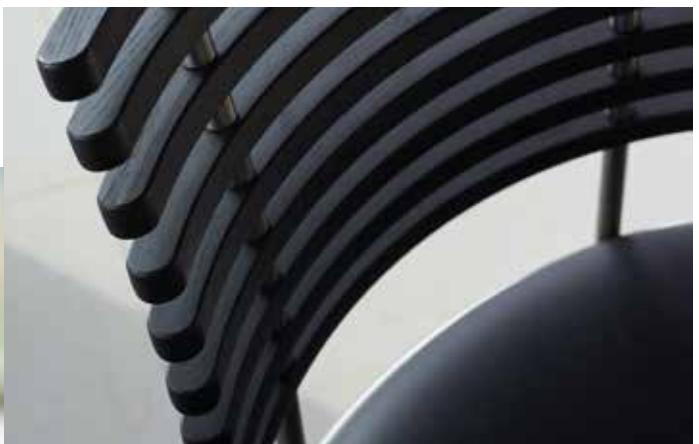

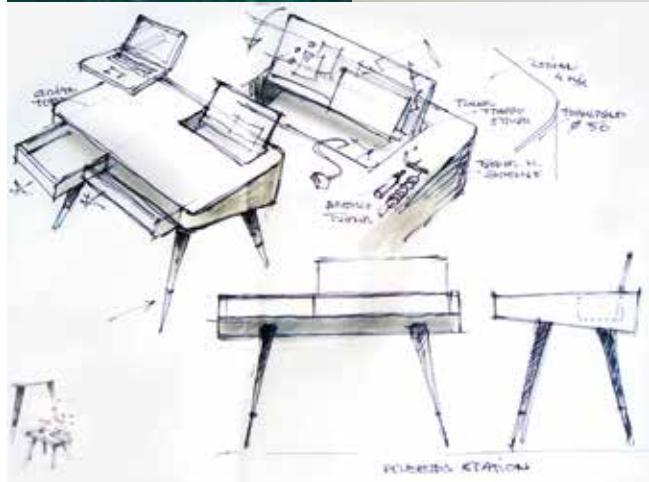

Vi giver træet tilbage til verden i skøn forarbejdning. Vi gør det under dansk himmelstrøg.

Naver Collection er solidt funderet og produceret i Danmark. Derved undgår vi unødige lange afstande og transporter, der påvirker miljøet negativt. Det er her design traditionen udspringer og gror videre fra. Vi er lige her - rundt om hjørnet.

We take pride in every detail

Nogle vil måske sige, at vi er lige lovlige kræsne i valg af materialer. Det følger måske naturligt med som naver. Det er i detaljerne håndværket viser sig. Vi forener vision, materialer og funktion i en æstetisk helhed, hvor

hver eneste detalje i møblerne udtrykker kvalitet og ypperligt naver håndværk.
